Attached Documents	Remarks
Brief Description of Terminal Equipment	Documents are to be briefly described model name, use, composition, functional capability and summarized specification of Terminal Equipment.
Test Report, etc. (* 1)	This is a document that describes to be complied with technical standards of terminal equipment, and it describes test results complying with the next (1) and (2), and it indicates that the said test results comply with the next (1) and (2). (1) Tested by measuring apparatus those are calibrated under conditions specified in paragraph 1, item 2 in Article 87 of Telecommunication Business Law. (2) Tested by measuring methods those are announced by MIC notice No. 99 (Jan. 26, 2004) or those are suitable compared with the announced methods.
Exterior View Drawings	View Drawing is to be described exterior, composition and size of a terminal equipment.
Schematic Diagram of Circuit Connection and Block Diagram	Diagram describing (1) a terminal equipment and connection method between other equipment connected with the terminal equipment and telecommunications circuit facilities, and (2) circuit composition as connection configuration of each functional block.
Operation Manual	Operation Manual is to be explanatory document for handling Instruction and Operation Manual of a terminal equipment.
Statement of the Confirmation Method of Certification (* 3)	The statement is necessary for application of Certification of Type, and It is a document containing matters listed in Table No.3 of the Ordinance and other necessary matters pertaining to the method to confirm that a terminal equipment coincide with the design, or a similar document: this is a document authorized by the registered approval body as a means to certify conformance to all the details pertaining to handling of terminal equipment, such as factories, to all matters listed in Table No.3; and so forth.

- * 1 Submission of terminal equipment is required in case where test report is not submitted.
- * 2 Submission of the following information on measuring instruments used for testing are required.
 - ① Model name or number, ② Manufacturer, ③ Serial number, ④ Calibration date,
 - ⑤ Name of Calibration laboratory, ⑥ Calibration certificate In case where measuring instruments correspond to paragraph 1, item 2 (d) in Article 87 of Telecommunication Business Law
- * 3 Any of the following certifications or a registration certificate equivalent to a certification which certifies that factory and others involved in producing terminal equipment are complied with all items specified in documents specified in Table No. 3 of the Ordinance Concerning Technical Conditions Compliance Approval, etc. of Terminal Equipment may be substituted for the documents. However, Any subjects which are not covered by the following certifications may not be substituted.
 - ① ISO9001:2008 ② TL9000
